- **Digital Marketing:** Social media strategy, short-form content, content planning, platform analytics
- **Business & Productivity:** Microsoft Excel, Word, PowerPoint, Google Workspace, SimilarWeb
- **Languages:** Fluent in English, Serbian, and Croatian

PROJECTS

Notch: Life Planner Organizer | *Swift, iOS* | App Store

- Designed, built, and published a native iOS planner app in Swift as the sole developer, covering tasks, assignments, budgeting, habits, and workouts with local persistence, backups, and export.
- Integrated the Gmail API, Google Calendar API, Apple HealthKit, and Strava to surface a user's email, calendar, health, and activity data in the app; built home screen widgets and local notifications.
- Reached ~200 downloads and ~150 active users, marketing the app independently through short-form video on Instagram and TikTok and shipping updates from user feature requests.

AutoCorrect | *Swift, macOS* | GitHub

- Built and released an open-source native macOS menu bar app in Swift that corrects spelling, capitalization, spacing, and missing apostrophes as the user types, fully offline with no language model.
- Implemented system-level text handling with Apple's NSSpellChecker and macOS Accessibility APIs, adding text expansion, custom replacements, per-app pausing, ignored words, and undo.
- Distributed via GitHub Releases and a Homebrew tap with an automated GitHub Actions pipeline.

AnimalFeed | *YouTube Shorts Channel*

- Grew a YouTube Shorts channel to approximately 3,000 subscribers and 3M+ total views in roughly 60 days by testing hooks, pacing, and posting timing against platform analytics.
- Used retention data to build repeatable short-form content formats for the posting schedule.

EXPERIENCE

SITES BY MARKO, Remote July 2026 – Present
Founder & Web Developer

- Cold call and email ~60 businesses per day, qualifying prospects by the condition of their existing site.
- Design and hand-code responsive business websites in HTML, CSS, and JavaScript, managing the full build and deployment workflow in VS Code and GitHub.
- Built an internal operations tool and custom Claude Code commands that source leads nationwide by market and industry, audit each prospect's website, and generate a matched outreach script.

MIAMI UNIVERSITY, Oxford, Ohio August 2026 – December 2026
Teaching Assistant — IMS 322: Intermediate Interaction Design and Development

- Assist 40+ students across two sections of IMS 322, an intermediate interaction design and development course covering HTML, JavaScript, and client/server application development.
- Work with students on in-class assignments and course projects, troubleshoot and debug their code, and provide additional help outside scheduled class hours.
